

Kesia Pires dos Santos

SUMMARY

I am a woman motivated in my IT studies and I have a great interest in acquiring practical experience and solving real-life problems. I thrive in online learning environments and have excellent organizational and time management skills, honed over the years.

EDUCATION

Data Science

Postgraduate certificate

Centro Universitário União das Americas / *Online/ January 2025- current*

Currently studying core concepts of Data Science as Statistics, Database Modeling, Python, and tools such as Jupyter Notebook and Oracle SQL.

Systems Analysis and Development

Technology Degree, 2000h

Centro Universitário União das Americas / *Brazil / January 2022 - July 2024*

During my studies, I have developed a foundation in systems analysis, software development, and project management. My coursework has included programming languages, database management, software engineering, software requirements, agile methodologies, among others.

Languages Portuguese and English

Bachelor's Degree (Incomplete)

Universidade Veiga de Almeida / *Rio de Janeiro, Brazil / May 2019 - June 2021*

Enrolled in a degree program to deepen my English proficiency and integrate practical teaching experience. Gained significant knowledge in advanced language skills and pedagogical methods.

Reason for Non-Completion: Transitioned focus to Information Technology and family responsibilities, leading to the decision to pause the program.

ADDITIONAL TRAINING

Personal Projects

I complement my studies by implementing my personal projects that includes concepts as web development and APIs.

Piscine

42Porto/ Onsite / 26 days in a row

The piscine itself is a life experience! It's 26 intensive days without breaks, spending an average of 10 hours a day with people from various countries who have different levels of knowledge in technology. There, we learn a bit of Shell and C without teachers, in a peer-to-peer program. We practically remake functions that already exist, such as: string compare, argc argv, atoi...

OOP using Python

Alura / Online / 25h

github.com/kesiapires

In this training, I delve into object-oriented programming while incorporating good coding practices. I learned to handle errors and manipulate different types of collections. Additionally, I could explore techniques for reading from and writing to different file formats using Python.

Python

Curso em Video / Online / 120h

This 120-hour course is broken down into three modules with over a hundred exercises. It taught me a lot and confirmed that IT is the field I want to pursue. After finishing the first 40 hours, which covered the first module, I balanced the course with my degree. This mix helped me put what I learned into practice and get a better grasp of the concepts. All the exercises are available on my GitHub.

Language Exchange

Apollo Language Centre / Dublin, Ireland / April 2018 - December 2018

ICOT College / Dublin, Ireland / January 2019 - April 2019

The exchange was a fantastic experience in my life in every way. I went to Dublin when I was 19 to learn English. I'm grateful to have taken advantage of the opportunity and to have learned many other things besides English, of course. I made friends that I still keep today, I lived with many nationalities and learned a lot about them and about myself. I had the experience of working in some companies in different roles as my English improved. My first job was babysitting a beautiful little girl, after that I worked as a cleaner at Dublin Public Hospital, then I learned how to make flower bouquets at Mad Flowers (working on holidays), and I worked for eight months at night as a waitress in a bar (Tim Youngs), where I made many friends.
